

Identificação de advertências de segurança

As advertências de segurança contidas no presente manual de instruções indicam a existência de perigos que podem surgir como consequência de determinados atos ou pela falta de determinados atos. Elas descrevem a dimensão do risco em caso de não observância das medidas de segurança mencionadas.

As instruções de segurança deste manual de instalação estão estruturadas da seguinte forma:

AVISO!

Este aviso de perigo alerta para uma **eventual** situação de perigo que **pode** resultar na **morte** ou em **ferimentos graves** se as medidas de segurança não forem respeitadas.

CUIDADO!

Este aviso de perigo alerta para uma **eventual** situação de perigo que **pode** resultar em **ferimentos menores** ou **ligeiros** se as medidas de segurança não forem respeitadas.

NOTA!

Este aviso alerta para o perigo de **eventuais danos materiais ou ambientais** que podem ocorrer se as medidas de segurança não forem respeitadas.

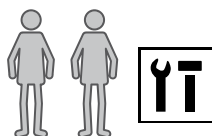

NOTA!

Quaisquer trabalhos de montagem só podem ser realizados por pessoal especializado em mobiliário.

NOTA!

Todos os trabalhos de montagem devem ser realizados por, pelo menos, 2 pessoas.

AVISO!

Perigo de ferimentos e danos materiais por tombamento de móveis não-fixados!

Ao abrir móveis não-fixados, estes podem tombarem e causar ferimentos graves e danos materiais consideráveis.

- Ao realizar a montagem, fixar os móveis à parede ou ao chão usando meios de fixação apropriados, para impedir que tombem.
- Observar as instruções relativas aos móveis fornecidos pelo fabricante.

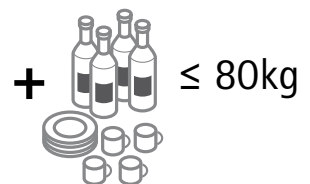

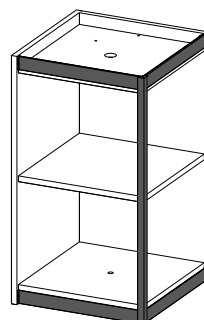

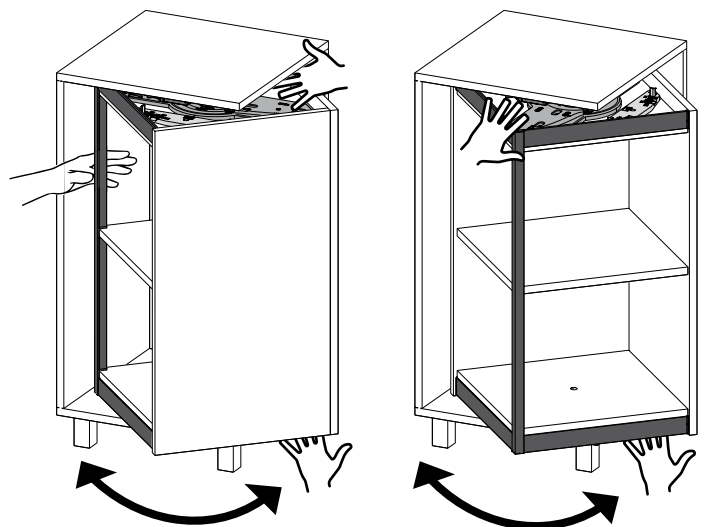

CUIDADO!

Perigo de ferimento por móveis que não tenham sido produzidos corretamente!

As partes não-fixas de um móvel podem conter pontos de esmagamento e cisalhamento (por ex., prateleiras salientes), que podem causar ferimentos.

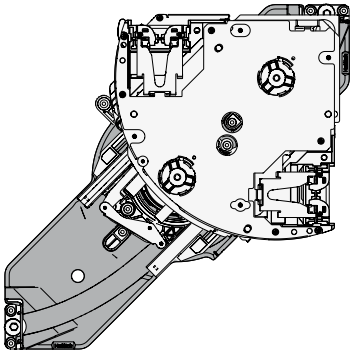

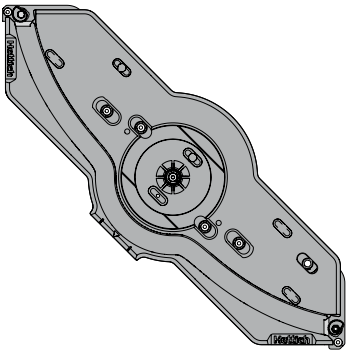

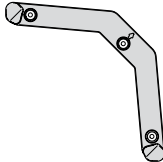

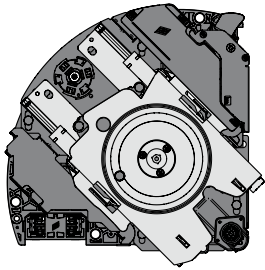

Podem surgir pontos de esmagamento nas situações em que as partes de um móvel estejam frente a frente ou dispostas em canto face a outros objetos.

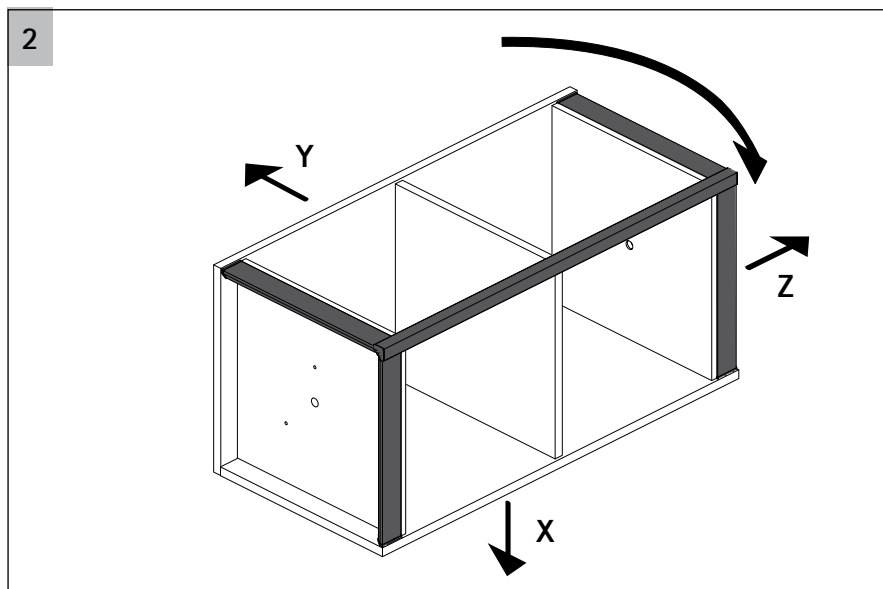

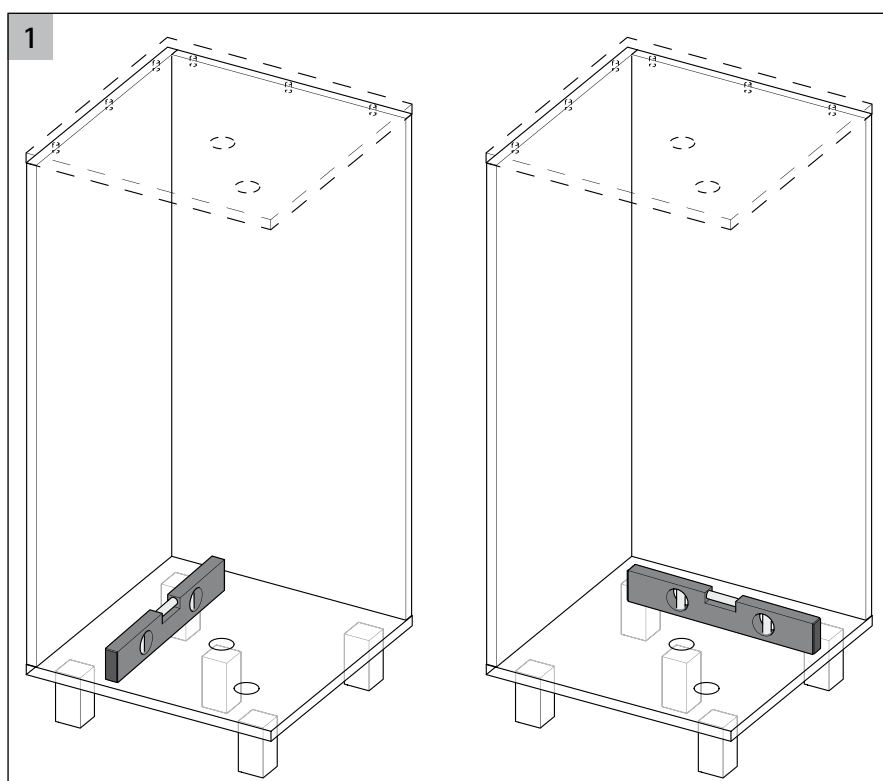

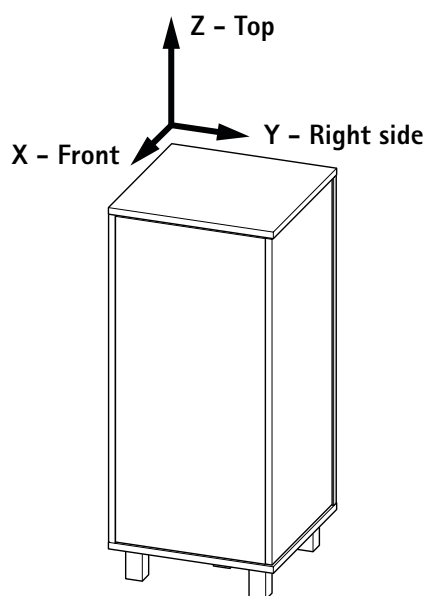

- Construir e montar móveis usando o estado da arte da tecnologia e empregando exclusivamente peças de mobiliário consentâneas com esse estado.
- Assegurar-se de que as distâncias junto a componentes não-fixos são inferiores a 8 mm ou superiores a 25 mm.
- Ao planejar e montar, assegurar-se de que seja mantida uma distância mínima de 500 mm entre móveis dispostos frente a frente e em canto.
